I am a fresh graduate of the Information Technology at Udayana University with a strong interest in data and technology. I am passionate about learning new things, especially in the ever-evolving world of technology. During my studies, I have been involved in various projects that include data analysis and processing, model building, and mobile application and website development. These experiences have further strengthened my interest and expertise in data and technology.

EDUCATION

Information Technology, **Udayana Univeristy** **2021 – 2025**

- Current GPA: 3.82/4.00

EXPERIENCE

Machine Learning Cohort, Bangkit Academy **August 2022 – September 2022**

- Gained in-depth knowledge in machine learning and data analysis, applying cutting-edge techniques to solve real-world problems.
- Collaborated within a high-performing team that ranked in the top 50 out of 500+ teams, showcasing strong teamwork, problem-solving, and technical skills.
- Achieved Distinction, awarded to the top 10% of the 4,500 cohort participants, recognizing outstanding performance and mastery of machine learning concepts.

Coding Teacher, CUBE **July 2023 – November 2022**

- Delivered fundamental to advanced coding concepts to students, fostering a strong understanding of programming principles.
- Successfully mentored 12 students to participate in the Kids Programming competition, with all of them ranking in the top 100.

ORGANIZATIONAL EXPERIENCES

SKP Division Members, **HMTI Udayana University** **January 2023 – December 2023**

- Responsible for conducting inspections of certificate documents as a graduation requirement for students within the Information Technology study program at Udayana University
- Responsible for ensuring that all certificate documents are submitted to the Faculty
- Act as a source of information and support to assist students in navigating the administrative processes effectively

Scientific Division Members, **MAESTRO Faculty of Engineering** **January 2023 – December 2023**

- Responsible for searching for information related to scientific competitions, seminars, and scientific paper training
- Actively explore various sources, including academic networks and up-to-date publications
- Ensure to obtain the latest and relevant information to present informative and engaging news and articles

PROJECT

Thesis, Service Reatime Predict Sentiment based on Articles **September 2024 – Mei 2025**

- Automation of realtime article data scraping and autolabeling based on stock price history
- Successfully retrain automatically every month
- Successfully perform service and can be integrated in the stock price prediction application.

Automatic Copywriting Of Fashion Products Using T5 **September 2024 – December 2024**

- Developed an automatic copywriting system for fashion product descriptions using the T5 model.
- Conduct experiments and performance comparisons between the T5 model with English and Indonesian datasets, and the T5-Indo model with Indonesian datasets.
- Evaluate the copywriting results based on the quality and relevance of the generated descriptions.

HemoCare Mobile Application **January 2023 – June 2023**

- Developing the HemoCare mobile application in the field of blood donation for PMI (Indonesian Red Cross) using Java programming language and integrating Firebase.
- Creating a user-friendly mobile application.
- Collaborating with one team member to prepare the final project report.

Hospital Infrastructure System Website **November 2022 – December 2022**

- Building a website using HTML, CSS, PHP, JavaScript, and incorporating the Bootstrap and DataTables frameworks.
- Developing a user-friendly website.
- Collaborating with four other team members to create the final project report.
- Successfully completing the website, evidenced by achieving with a score of 81 out of 100.

SKILLS

Programming Languages: Python, SQL, Excel, C, HTML, CSS, Java Script, Java, and PHP.

Software: Google Colab, Jupyter, Visual Studio Code, C++, Android Studio, Postgresql, Ms. Office, Ms.Excel, Ms. Powerpoint, Figma, Canva, Mathlab.
